Darkest dungeon farmstead provision guide

Bring Farmstead Dangerous Enemies Prev start tips to take as many conse with you as you can. As has been mentioned several times before, the game on the farm is very different from other areas. Your only goal is to survive and kill as many enemies as you can. Take:Medicinal plants - removes negative effects that can be caused by almost any enemy. Holy Water - increases the resistance of the figure to negative statuses for some rounds, especially useful during boss fights. Bandages - stops a figure from bleeding (this condition does not appear often but it can still be a problem for you). Antivenom - removes the Blight effect which is caused by most enemies, including the bosses. Food -- your party doesn't move here which means they don't have to eat. However, this item is very useful when you manage to make a camp (during an interaction with one random koryo). Ignore shovels and torches - these items are not used here, and the player has no effect on light. As for other items, you should also take two full stock of herbs, holy water, Antivenom bandages, as well as 16-24 units of food. You can also use Shard dust, which means if you are not afraid of the consequences - use it carefully, you do not want to kill your characters.
